January 24, 1992

OFFICE MEMORANDUM

*RAGD*  
*RRM*  
Subject:- Samleshwari Overcast Project- Environmental Clearance.

This has reference to the letter No.43011/14/87-CPA dated August 1, 1991 in regard to the above subject. The environmental aspect of the project have been examined and clearance is accorded subject to the effective implementation of the following:

- (i) The SPM levels at all the loading, unloading operations should be controlled in such a way that particulate matter concentrations at 100m. distanced from any such operations should not be more than 500  $\mu\text{g}/\text{m}^3$ . The emissions of SO<sub>2</sub>, NO<sub>x</sub> etc. should also be maintained within the prescribed norms. If it exceeds the limit, the system/operations contributing to the emission load should be stopped immediately and should not be restarted until it is rectified to bring down the SPM concentration.
- (ii) Regular monitoring of air quality, water quality and noise levels should be made and recorded data should be furnished to the State Pollution Control Board and to this Ministry quarterly. The project proponent should give special emphasis to monitor silt load and nitrate content of the run of water before meeting the main water course. The recorded data should be furnished to this Ministry quarterly.
- (iii) The effluents generated in the workshop, mine water effluents from the soakpits should be treated before discharging into the drain. It should conform to the standard published by Notification No GSR.919(E) dated 12th September, 1988.
- (iv) A gully drain near the toe of the overburden dump must be provided.
- (v) Slopes of external dump of each should be maintained at a maximum of 28 degrees.
- (vi) The direct damage of land by mining activity should be restricted to only 285 ha. of which 166.03 ha. should be back-filled and balance should be left as water body. Total 7.5 ha. s. would be required for external dumping only.

- (iii) The top soil in all areas earmarked for external overburden dump and coal stocks shall be removed and utilized for biological reclamation of the mined land, within three to six months depending upon the season. If the utilisation is not possible within this period, the top soil shall be preserved with the help of leguminous plants/grass and fertilizers. The reclaimed area as well as external dump area should be afforested at the rate of 1000 trees per acre and the reclaimed land handed over to the Forest Department.
- (iv) The rehabilitation package of 250 families should be as per the Central Government package in consultation with the State Government. The basic infrastructural facilities to be developed before handing over the land proposed for rehabilitation or the evicted families.
- (v) A green belt should be maintained between colony and other infrastructural facility of the mine to attenuate the noise levels and to arrest the movement of dust.
- (vi) The crusher, screens should be provided with inbuilt control measures to prevent the workers from occupational health hazard due to exposure to noise. The noise level should not exceed 40dBA at a distance of 10m from the source.
- (vii) The depth of the water bodies created in the quarried land after reclamation must be kept to a maximum of 30m, and approach slopes to the water should be made gentle to enable the water to be used for economic purposes.
- (viii) The progress report of the implementation of the conditions should be furnished to this Ministry and State Pollution Control Board quarterly.
- (ix) A separate Environmental Management Cell with suitably qualified people to carry out various functions relating to environmental management should be set up under the control of senior technical person, who will directly report to Chief Executive. A laboratory facility should be set up for collection and analysis of samples.
- (x) The damaged forest land should be reclaimed and afforested at the project site in consultation with the State Forest Department before handing over the land to the State government.
- (xi) Financial provision (capital and recurring expenditure) made towards environmental control measures should not be diverted for any other purpose.
- (xii) The Ministry reserves the right to modify the conditions or revoke the approval if necessitated either due to change in scope and consequent environmental scenario or the feedback from monitoring the impacts of the project.
- (xiii) The above conditions will be enforced inter-alia under the provisions of the Water (Prevention and Control of Pollution)

— 3 —

Act, 1974, the Air(Prevention and Control of Pollution) Act, 1981 and the Environment(Protection) Act, 1986.

Failure to comply with any of the conditions mentioned above shall result in withdrawal of the clearance granted herewith.

H. F. Gossard

( H. PARABRAHMAN )  
ANVILK (RE)

The Secretary,  
Department of Coal,  
Shastry Bhavan,  
New Delhi-110001

Copy to:

1. Chairman-Executive Director South Eastern Coalfields Ltd. Seepat Road, Post box No.60, Bilaspur-495001.
  2. Chief Conservator of Forests, Regional Office of Ministry of Environment & Forests, Eastern Zone (Attention: Mr. Rao, Scientist SE) 194, Kharvela Nagar, Bhubaneswar-751001.
  3. Chairman, Orissa Pollution Control Board, A-118, Nilakantha Nagar, Unit-VIII Bhubaneswar-751012.

P. Panzica, M.D.
